Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson in view of McCarthy.

The patent to Wilson shows an outrigger 10 with an outrigger securing assembly 53 as shown in Fig. 2. The patent to McCarthy shows a securing assembly having coupling means 14 for releasably securing shank 36 in a fixed position. McCarthy shows collar means 10 for interfacing with the coupling means. McCarthy shows the coupling means 14 receiving and locking the collar means 10. McCarthy shows the coupling means further including means for releasing the collar means noting Figs. 1-3. In reference to claim 1, it would have been obvious to provide Wilson with a securing assembly as shown by McCarthy since merely one mechanically equivalent securing assembly is being substituted for another and the function is the same. McCarthy shows the coupling means having a support arm 18 and a head 34 mounted about one end of the arm 18. McCarthy shows upper and lower complementary jaws 20, 22. both of the jaws are movable noting Figs. 1-3 which show the jaws moving toward the locking pin. McCarthy shows biasing means 46 to maintain the jaws in a closed position shown in Figs. 3. In reference to claim 3, McCarthy shows in Figs. 2-3, recessed channel means

Art Unit: 3643

30 in the jaws for retaining the collar means. In reference to claim 4, McCarthy shows means 12 for attachment to an outrigger and interlocking means 16 for insertion into the coupling means 14.

Allowable Subject Matter

3. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claim 6 is allowed.

Response to Arguments

5. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's arguments filed May 23, 2004 have been fully considered but they are not persuasive. Applicant invokes 112, sixth paragraph for the means plus function limitations recited and argues that this overcomes McCarthy along with the fact the McCarthy does not show an outrigger securing device. However, McCarthy is not cited to show an outrigger securing device. The patent to Wilson shows an outrigger and an outrigger securing device. McCarthy shows a coupling means, a collar means and a securing assembly. This is an equivalent structure to that recited by applicant. McCarthy shows a spring biased collar with pin 42. The upper jaw of McCarthy have a movable component such as at 20, 24, 26 which deforms to latch over locking pin 16. This is an equivalent structure to a pivoting jaw. McCarthy shows a separate cylindrical housing means 14 that incorporates an external pin 42 within the flanges 34.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
